

**NOTIFICATION OF LAWS AND REGULATIONS UNDER
ARTICLES 18.5 OF THE AGREEMENT**

BRAZIL

Corrigendum*

The following communication, dated 10 May 2012, is being circulated at the request of the Delegation of Brazil.

In pages 16 and 17 of the document G/ADP/N/1/BRA/2/Suppl.8, Fields 16.0 and 16.1 should read as follows:

Field 16.0 – **Freight from Production or Warehouse Unit to Customer:** provide the internal unit freight cost from the point of production to the point of delivery designated by the customer. If freight allocation is necessary by virtue of the variety of items contained in the shipment, said allocation should employ the same basis as that used to calculate the freight (e.g.: weight, volume). Describe the means of transport used to deliver the goods to customers. In the event it is not possible to identify the cost of each shipment, describe the manner in which the unit freight was calculated, attaching, to this end, the respective calculation spreadsheet. If the company uses its own vehicles, outline the manner in which the freight was calculated, providing the total cost incurred for this purpose (e.g.: fuel).

Field 16.1 – **Freight from Production Unit to Warehousing Facility:** in the event the company incurs freight costs to move the unit of production to a warehouse facility, the unit freight cost may be provided.

Please also note that the following table replaces Appendix XVI of page 31:

* In English only.

APPENDIX XVI
SALES ON THE DOMESTIC MARKET
